In response to the remarks in the 9/27/04 Appeal Brief, the Office has reconsidered the rejection of record and believes the instant claims define over the art of record.

The following is an examiner's statement of reasons for allowance: In addition to the remarks of record, the cited prior art fails to teach or anticipate a detector for detecting a plurality of markers that generates signals indicative of relative concentrations of each marker. Further, the cited prior art fails to teach a system for measuring a plurality of silent markers and correlating the relative ratios of the silent markers to a look up table of stored values which identifies the marked fluid. Finally, the cited prior art fails to teach a detector that specifically measures carbon-nitrile or isocyanate vibrations.

The Office notes the "Coulombe" reference, cited in the attached PTOL-892, was supplied by Applicants' on 2/2/01 and not previously considered. The Office regrets the delay in consideration.

The Office also notes this application was filed as a "CIP" of 08/885,164 now USP 5,958,780. Upon review of the parent file, it is noted a restriction requirement was mailed out 7/21/04 where Applicants' elected to prosecute the method claims which are the claims of the parent patent USP 5,958,780. The instant claims are directed to the non-elected apparatus claims of the parent. Because the restriction was made in the parent application, it does not appear there are any double patenting issues that would require a terminal disclaimer of the parent application 08/885,164.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
